For a clean and protected environment

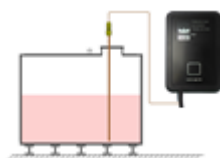

IMPROVED TECHNOLOGY:

Level indicator FA 7

New
Innovation

- **Bigger, multi-digit display**
On the 5-digit display, you can easily see the current content.
- **Display in liters, percent and centimeters**
Automatically changing the display of liters, percent and centimeters
- **Easy installation + operation as usual**
One press of the button is enough and the content is measured and displayed.

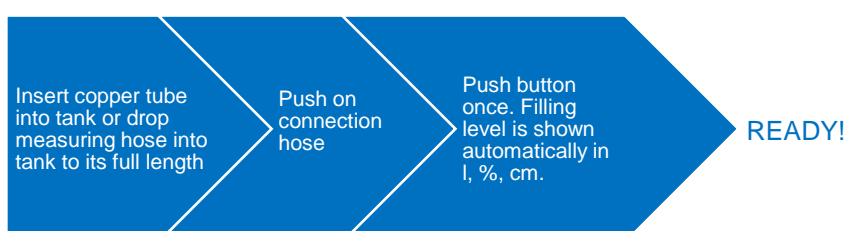

Tanks/containments: all designs, all materials

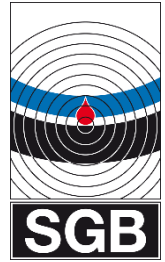

The FA 7 is made for the use on heating oil and diesel tanks. The filling level indicator is suitable for all tanks designs up to 3.0 m diameter or height (ball-shaped, cylindrical, recumbent, battery tanks) made from plastic as well as steel.

No power socket, easy installation

The filling level indicator FA 7 is battery-powered (9 V). After wall mounting, the parameters such as tank type, tank height and tank volume are entered on the display. Thereafter, the measuring process can be started.

How to use the FA 7:

Overview filling level indicator FA 7

Art.-No.	Description
110701	Filling level indicator FA 7 with measuring hose 3 m and stainless-steel weight

Art.-No.	Description
110711	Filling level indicator FA 7 with copper measuring tube 3 m rolled as ring

Art.-No.	Description
110721	Filling level indicator FA 7, substitute for existing indicator (reducer 4–6 mm); for installations with existing measuring pipe to the deep point of the tank
