**New and available now:**

## **CONDENSATE TRAPS MADE BY SGB**

**all sizes | all materials | all connections**

The new condensate traps from SGB are now available. They are used in vacuum leak detection systems and collect condensate occurring at the low point of the connecting line.

The SGB condensate traps, which were specially developed for this application, are characterized by durable materials, a robust design and a wide range of connection options.

**1-fold or 3-fold design**

**30 ml volume per condensate trap**

**Container made of plastic or stainless steel**

**All types of connections (hose, clamping ring, quick)**

**Connections made of brass, nickel-plated brass or stainless steel**

You can find more about these new and many other condensate traps and practical accessories in our B2B online store.

## **17-19 May 2022: UNITI expo in Stuttgart, Germany**

The leading trade fair for the filling station industry in Europe "UNITI expo" will take place from 17 to 19 May 2022 at Messe Stuttgart. And we will be there as an exhibitor!

**SGB: Hall 5, Booth B12**

We present the latest developments and innovations around our leak detectors for double-walled tanks and pipes.

Trade visitors can register free of charge under the link below.

**We are looking forward to seeing you!**
