

LEAK PREVENTION TECHNOLOGY

Our know-how for a clean and protected environment

Technology & Trends 04 | 2021

If the newsletter is incorrectly displayed, please click [here](#).

The final spurt before the turn of the year is just the right time to get informed about the latest developments in leak detection technology. In the following, we invite you to learn more about our new, technically **improved DL-ELC** leak detector for monitoring multiple tanks, our **wide range of installation kits** for connecting tanks and pipes, our **digital training** opportunities, and our new practical tool in the **online store**.

We look forward to seeing you again soon – especially when we meet in person at the UNITI Expo in Stuttgart in May. Until then, we wish you all the best and a healthy start into the new year!

PS: Please mind our opening hours at the end of the year!

Better leak monitoring of underground tanks with DL .. ELC

The pressure leak detector DL ... ELC consists of a leak detector and a separate leak indicating unit. The leak detector (see on the left) is equipped with an integrated manifold to which up to 6 double-walled underground tanks can be connected. Furthermore, the DL ... ELC is equipped with the practical dry filter monitoring system "FC". This signals that the dry material has been used up and must be renewed in good time.

shop.sgb.de/en: Biggest variety of tank and pipe connections

No matter if tank or pipe – with our installation kits you always create the best connection between the leak detector and the tank or pipe to be monitored.

Select from our wide product range of installation kits: for PVC hose connection, copper pipe, PA hose, with different thread sizes, with and without flange plate, for Ex and non-Ex devices.

Good to know: Installation kits for all common pipelines of all known manufacturers are available on shop.sgb.de/en!

Professional online training for a good start into the leak prevention year 2022

With **SGB webinars**, you can start the new leak detector year 2022 well-trained and safe. Suitable for newcomers to the industry as well as for old hands who want to update their knowledge.

Our training courses take place online as webinars. You can choose between the modules

- a) **"Filling station"**, focusing on gas stations and
- b) **"Tank Farm"**, focusing on storage tank farms, refineries, and industrial plants, etc.

New course offer: 1-hour product training on VL 34, VL 330, or DL 330.

Higher rated: Stainless-steel housing now IP 66

Leak detectors that are mounted outdoors are optimally protected against external weather influences with the stainless-steel housings from SGB. With the classification in protection class IP 66, they are not only completely dust-tight but in addition also protected against strong jets of water.

The high-quality stainless-steel housing with IP 66 is used with all pressure and vacuum leak detectors* (Ex/non-Ex) in the P variant.

* Exception DLG .. PM = IP 54 technically required

New feature in our B2B-online shop

Who does not know this scenario? You need exactly the same equipment as last time. And the documents are somewhere ... but where?

To save you a long search, we have equipped our online B2B store with a new function: From now on, registered users will see their orders clearly displayed in the "History of documents" and can easily trigger them again, if required.

[More on our shop](#)

A screenshot of the B2B online shop interface showing the "History of documents" section. The interface is in German and includes a search bar, filters for period, status of order, and show options. A table displays a list of documents with columns for Document No., Your document No., and Value of goods. The table shows one document with a value of 3,47 €.

Document No.	Your document No.	Value of goods
17.11.2021	121103483 Test	3,47 €

Welcome back: UNITI expo in Stuttgart, Germany in May 2022

The leading trade fair for the service station industry in Europe, "UNITI expo", will take place from **17 to 19 May 2022** at Messe Stuttgart. After the trade fair in 2020 had to be cancelled due to corona, we are even more pleased to exhibit at UNITI expo again. You will find **SGB at booth B12 in hall 5**. We are looking forward to seeing you again!

As a leading manufacturer of leak detection technology, we will present the latest innovations in explosion-proof leak detectors, combined solutions for leak monitoring of tanks and pipelines, as well as new and further developments of pressure and vacuum leak detectors.

Go directly to UNITI expo

Dates to mind: End-of-year information

Please note the following dates when planning your projects/orders:

22.12.2021:

Deadline to accept orders for this year's shipment - subject to item availability.

23.12.2021:

Last business day. We will be happy to assist you until 3 pm.

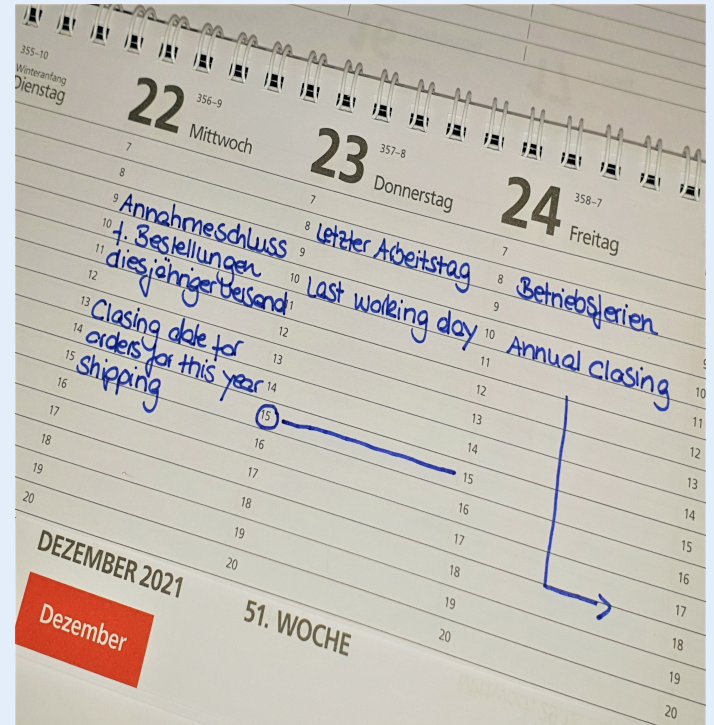

24.12.2021 until 09.01.2022:

We are on company vacation. Office, production, and incoming/outgoing goods will be closed during this time. Also, inquiries/orders via our online store will not be processed.

10.01.2022:

We are glad to be there for you again.
